

# FLX Series DSP-Enabled Amplifiers

The FLX Platform is the most versatile 1/2 rack networked amplifier Stewart has ever produced. This compact package contains over 300 watts of power output in various channel configurations and impedances. At the heart of the platform is a robust, internal full function DSP that is designed to solve a multitude of your audio problems in just one box. The channel count varies from 1-4 channels and the DSP allows further configuration via bridging, routing, EQ, Filters, limiters and much more. A USB port makes programming simple, fast and repeatable for large installations. The RVC and RS232 control allow volume control from a wide range of devices. In addition, the FLX platform has an optional factory installed Dante™ or CobraNet® card with 2 channels of networked audio. You won't find a more flexible combination of power output and processing in a comparable package on the market today.

The Difference is Hear

## FLX Series

FLX80-4	80W x 4 @ 4 Ohms
FLX80-4 CV	80W x 4 @ 70V/100V
FLX160-2 CV	160W x 2 @ 70V/100V
FLX320-1 CV	320W x 1 @ 70V/100V

### Features:

- Onboard DSP for signal routing, filtering, bridging, and set programming
- USB and RS232 available for configuration
- Dante™ & CobraNet® interface available
- 1/2 rack package
- Remote Volume Control
- Signal Sense Technology
- Made in the USA

### Applications:

- Network Audio
- Hospitality Installations
- Classrooms
- Conference Rooms
- House of Worship
- Dividable Rooms
- 2.1 Installations
